Will electricity demand drop in 2023?

Electricity demand in the European Union is set to decline in 2023 for the second year in a row, falling to its lowest level in two decades. EU electricity demand is expected to record a 3% drop in 2023, after already falling 3% in 2022. This is despite strong growth in electrification with a record number of electric vehicles and heat pumps sold.

Why did electricity prices drop below zero in 2023?

The number of hours in which electricity prices dropped below zero doubled in European countries such as Germany and Netherlands in the first half of 2023 compared to the same period in 2022. This was driven by strong renewables output at times of significantly reduced demand.

Are wholesale electricity prices still high in 2023?

Similarly, average wholesale electricity prices in India in the first half of 2023 were still 80% higher than 2019 levels, and in Japan they were 30% higher compared to 2019. In contrast, wholesale electricity prices in the United States have almost fallen back to 2019 levels.

Will China's electricity demand increase in 2023?

In contrast, China's electricity demand is expected to increase by 5.3% in 2023 and 5.1% in 2024, slightly below its 2015-2019 average of 5.4%. India is set to have an average annual growth rate of 6.5% over the outlook period, surpassing its 2015-2019 average of 5.2%.

Do projected cost reductions for battery storage vary over time?

The suite of publications demonstrates wide variation in projected cost reductions for battery storage over time. Figure ES-1 shows the suite of projected cost reductions (on a normalized basis) collected from the literature (shown in gray) as well as the low, mid, and high cost projections developed in this work (shown in black).

Will Japan's electricity demand increase in 2023?

Japan is similarly expected to record a significant 3% fall in electricity demand in 2023, while the United States is set to see a decrease of almost 2%. In contrast, China's electricity demand is expected to increase by 5.3% in 2023 and 5.1% in 2024, slightly below its 2015-2019 average of 5.4%.
