

8200 movement failure unable to store energy

What happens when the power fails for the 8200+?

If the power fails for longer than the selected power fail recover time for the 8200+, it will power up in one of four power fail recover modes: stop, hold, run, or restart. If the power failure is shorter than the power fail recover time setting, or if the setting is 0:00:00, the 8200+ will recover by returning to its last mode of operation.
