

Average domestic energy storage price per 150MW in Bulgaria

How much does electricity cost in Bulgaria?

In the beginning of 2022, the average price of electricity in Bulgaria amounts to EUR 131.95 per megawatt, whereas in July last year it was to the tune of EUR 95 per megawatt. However, between July 2021 and January 2022, the price of electricity has fluctuated and at times, it exceeded EUR 300 per megawatt.

How much does a battery cost in Bulgaria?

Currently, Bulgaria's electricity market offers an opportunity for EUR110 (\$122) per MWh profit on battery energy storage with two hours of discharge capacity using energy arbitrage. Rystad Energy's analysis estimates battery system costs at a flat EUR60 (\$67) per MWh.

Why is energy storage important in Bulgaria?

In 2023, the Bulgarian Parliament introduced specific legislative amendments regulating the electricity storage. The rationale behind the amendments is to provide balance and flexibility to the power system. Energy storage is a crucial step for low-carbon economy since it enhances the security of supply and the development of renewables capacity.

How much battery energy storage capacity does Bulgaria have?

Bulgaria has installed between 40 MWh and 50 MWh of battery energy storage capacity to date. However, new national legislation as well as funds provided through the European Union's Recovery and Resilience Facility (RRF) could add another 1 GWh of storage capacity over the next two years.

Why are electricity prices so high in Bulgaria?

Rising costs for fossil fuels and CO₂ emissions are already pushing electricity prices in Bulgaria to record high levels. In response, businesses are turning to renewable energy to lower their electricity bills.

How much money does the Bulgarian Energy Ministry provide for energy storage?

The Bulgarian Energy Ministry opened a tender procedure for supply of energy storage on August 21, 2024. The procedure aims to provide funding for construction and implementation of a 3,000 MWh stand-alone battery storage facility. The total amount of the grant that can be provided under the procedure is EUR590 million (\$536 million).

The Association for Production, Storage, and Trading of Electricity (APSTE) has published a report on the technological development and market perspectives for the energy storage systems in Bulgaria.

3.8 TWh per year for both 2021 and 2022. This increased output constitutes 95% of the total growth in generated electricity during the period 2021-2022, compared to the levels from 2020.

Average domestic energy storage price per 150MW in Bulgaria

Bulgaria's energy sector is at a critical juncture, with two main objectives shaping its direction: decarbonization and reducing reliance on Russian energy. Over the past ...

International Power Supply (IPS), a Bulgarian manufacturer of battery energy storage systems, is about to launch operations at its new facility near Sofia. Its latest model has 8.2 MWh and fits into a standard container. ...

Bulgaria's Energy Minister Zhecho Stankov at the facility | Image: Ministry of Energy of the Republic of Bulgaria Bulgaria has inaugurated a 124 MW / 496.2 MWh battery energy storage system (BESS) in the town of ...

Approximately 200 million EUR investments to encourage the combination of new renewables with local electricity storage facilities (totaling around 200 MW); Transformation of AES ...

The Current State of the Bulgarian Power Market: Why is Energy Storage More Relevant than Ever? The Bulgarian power sector is currently attracting significant interest from foreign and ...

Welcome to our tracker on consumer energy prices in Europe, sourced from the latest Eurostat data covering the second half of 2024. On this page, we focus on Electricity ...

The assessment adds zinc batteries, thermal energy storage, and gravitational energy storage. The 2020 Cost and Performance Assessment provided the levelized cost of energy. The 2022 Cost and Performance Assessment ...

The selected projects will deliver a total usable battery energy storage system (BESS) capacity of 9,712.89 MWh, the Ministry of Energy said on April 17, more than three times the minimum target of 3 GWh originally set by ...

Bulgaria's energy minister Zhecho Stankov on Thursday inaugurated what is described as the largest battery energy storage installation currently in operation across the EU -- a nearly 500-MWh system.

The average 2024 price of a BESS 20-foot DC container in the US is expected to come down to US\$148/kWh, down from US\$180/kWh last year, a similar fall to that seen in 2023, as reported by Energy-Storage.news, when CEA launched ...

As seen across many European markets, a lack of a comprehensive policy framework for energy storage is hindering Bulgaria in the development of an energy storage market.

In a matter of months, Bulgaria's total solar power capacity is set to exceed 3 GW, compared to just 1.3 GW at the end of 2021. The lineup in the list of the largest photovoltaic plants is changing almost every week as

Average domestic energy storage price per 150MW in Bulgaria

major ...

Developers of 82 standalone battery storage projects in Bulgaria, for an overall 9.71 GWh in capacity, got approval for EUR 587 million in subsidies from the Ministry of Energy.

The assessment adds zinc batteries, thermal energy storage, and gravitational energy storage. The 2020 Cost and Performance Assessment provided the levelized cost of energy. The 2022 ...
