

Average solar with battery price per 20kW in Indonesia

How much does a solar system cost in Indonesia?

The average pricing of a solar system in Indonesia is IDR 15 - 21 million per kW installed and even less if for larger installations. For the batteries, you can expect to pay an additional IDR 10 - 12 million per kWh for LifePO4 lithium batteries, which give you the biggest bang for your buck.

Which solar panels should I buy in Indonesia?

Most solar installers in Indonesia usually recommend panels made by "Tier 1" solar panel manufacturers. The Bloomberg New Energy Finance uses this tiering system as a measure of a manufacturer's reliability and consistency. The prices of "Tier 1" solar panels vary based on where they are manufactured, their efficiency and warranty durations.

Where is the best place to get solar energy in Indonesia?

On average Indonesia receives between 1500 kWh and 2200 kWh per m² of annual solar energy on a horizontal surface (Global Horizontal Irradiance, GHI). Java, Sulawesi, Bali, and East and West Nusa Tenggara are the best locations for solar PV, while Kalimantan, Sumatra and Papua are less good.

How fast can you charge solar batteries in Indonesia?

As previously mentioned, in Indonesia you get an average of 4.2 kWh per kW of solar installed. With that in mind, you would want to be able to charge your batteries in 3 hours (or even faster in cloudier areas) so that you can still have some surplus for day use on sunny days, and can charge the batteries fast enough during cloudier days.

What are the best solar panels for landed homes in Indonesia?

The most popular solar panel brands in Indonesia are typically the more affordable top Chinese manufactured panels in the list such as LONGi, Jinko, Trina, JA Solar, etc. Here's a rough estimate of the standard system cost for landed homes in Indonesia. Remember that installation costs will also vary depending on the above factors.

How much energy does a solar panel produce in Bali?

Remember, solar panels need direct sunlight to produce energy! In Bali, Lombok, and many parts of Indonesia, this translates to an average of 4.2 kWh (kilowatt-hour) per kW of solar installed. When there is cloud cover or rain, your power output will drop. At night, it won't produce any energy at all.
