

# Battery storage container project financing options in Portugal 2025

How many energy storage projects will Portugal support in 2025?

Portugal's Ministry of Energy has allocated EUR100 million to support 43 energy storage projects, scheduled for completion by the end of 2025. These projects were selected from 79 applications under the country's Recovery and Resilience Plan (RRP), with eligible projects able to receive up to EUR30 million in funding.

Does Portugal support battery energy storage projects?

Portugal has awarded grant support to around 500MW of battery energy storage system (BESS) projects, using EU Recovery and Resilience Plan (RRP) funding, a bloc-wide scheme that has supported energy storage across the continent.

How much money will Portugal spend on energy storage projects?

This included six projects from Spain's Iberdrola, which secured nearly EUR20 million (\$20.6 million) in public funding. From ESS News Portugal's Ministry of Energy has announced that it has allocated EUR100 million (\$104.2 million) to 43 energy storage projects which should be installed by the end of 2025.

How much will Portugal spend on energy storage & grid flexibility?

The Portuguese Ministry of Energy has allocated EUR99.75 million (\$107.6 million) for grid flexibility and energy storage projects which should be installed by the end of 2025. From ESS News Portugal is seeking to promote flexibility and balance its power system with energy storage as it continues to break records for solar energy production.

Why should Portugal be a reference space for innovation in batteries?

To promote the national value chain and innovation ecosystem in the international market for energy storage technologies and materials, positioning Portugal as a reference space for innovation in batteries.

Will energy storage projects help stabilize the electricity grid?

The energy storage projects will help stabilize the electricity grid and contribute to a greener, more sustainable energy transition. Portugal's Ministry of Energy has allocated EUR100 million to support 43 energy storage projects, scheduled for completion by the end of 2025.

Portugal's Ministry of Energy has announced that it has allocated EUR100 million (\$104.2 million) to 43 energy storage projects which should be installed by the end of 2025.

A total of 43 projects were selected from 79 applications in Portugal's 2025 energy storage procurement. This included six projects from Spain's Iberdrola, which secured ...

Executive Summary In this work we describe the development of cost and performance projections for

# Battery storage container project financing options in Portugal 2025

utility-scale lithium-ion battery systems, with a focus on 4-hour duration ...

This diverse group of stakeholders underscores the growing support for energy storage as a critical component of the future energy infrastructure. Mufasa stands out as the largest utility-scale battery storage ...

With fluctuating energy prices and the growing urgency of sustainability goals, commercial battery energy storage has become an increasingly attractive energy storage ...

With its energy storage strategy, Germany has set ambitious goals and aims to achieve nearly climate-neutral power supply by 2035. For this to be accomplished, the integration of renewable energy sources must be ...

Why securing project finance for energy storage projects is challenging It has traditionally been difficult to secure project finance for energy storage for two key reasons. Firstly, the nascent ...

Demand for energy storage continues to escalate, the global battery energy storage (BESS) landscape is poised for significant installation growth and technological advancements. A report by global research and ...

All public or private legal renewable electricity producers are eligible for a non-refundable subsidy of up to 20 per cent of the eligible costs, with a maximum amount per project of EUR30 million.

Learn about Poland's EUR1 billion energy storage subsidy aimed at installing 5.4 GWh of BESS by 2028, strengthening grid stability and accelerating the green transition.

Portugal will launch a competitive tender for 750 MVA of battery energy storage before January 2026, as part of a broader EUR400 million package aimed at improving grid ...

A 5MW/20MWh BESS project Powin and Hitachi deployed for Galp in Portugal. Image: Powin / Hitachi / Galp. Galp has kicked off construction on five new battery energy ...

Galp has entered into a partnership with North American company Powin to install an energy storage system, using large-scale batteries, in one of its photovoltaic plants, in Alcoutim, in the Algarve.

Portugal is preparing to hold a competitive auction for 750 MVA of battery energy storage capacity before January 2026. This initiative is part of a EUR400 million investment ...

Electronics Production | April 21, 2025 Galp and Powin launch 5MW battery storage system in Portugal Installed in the southern Portuguese region of the Algarve, the 5MW/20MWh battery system enhances the site's ...

Portugal's government has announced the outcome of an energy storage tender that will see the

# **Battery storage container project financing options in Portugal 2025**

installation of 500 MW of energy storage capacity to support the country's energy transition.
