

Can ub type po be dumped

Do you need to differentiate UB and NB document types?

In future,the user will not need to differentiate between the document types UB and NB. You can create various stock transport orders as standard purchase orders. In these orders,the prerequisite for cross-system stock transfer orders is that all possible supplying plants have been created in the ordering ERP system as vendors.

What happens if I delete a Po item?

Material 4711 15.6. If you change any shipping-relevant data in a PO item,then the item is delivered again. Any existing unchecked delivery items are replaced. When you delete a PO item,all corresponding delivery items are also deleted. If a checked delivery item already exists,then the PO item is not deleted.

How many Po types are there in a me21n?

There are five po types in my ME21N,they are DFPS,int.?Dummy?Framework?Stock transp.What is the mean of everyone,and which can I use when subcontracting? Regards,zhou. Know the answer? Help others by sharing your knowledge. Need more details? Request clarification before answering. 2009 May 23 2:04 PM Hi
