

Cape town jiepai energy storage power station

What is Cape Town's energy strategy?

As part of its long-term energy strategy, the city plans to invest R39.5 billion in infrastructure between July 2024 and June 2027. Furthermore, Cape Town has issued a tender for its first battery energy storage system, which will feature a capacity of 5 MW/8 MWh.

Where is Cape Town building a solar power plant?

The city is currently building a 7 MW solar facility in Atlantis, about 40 km north of Cape Town, with plans to increase capacity to 10 MW in the future. The R200 million (\$11.3 million) project is being managed by the Lesedi Technoserve consortium, which is responsible for the engineering, procurement, and construction.

How can Cape Town encourage residential adoption of solar energy?

To encourage residential adoption of renewable energy, Cape Town has also launched an online solar authorisation portal to simplify the process of obtaining certificates for installing solar panels and battery systems in homes, reducing wait times and motivating more households to switch to solar power.

What are Cape Town's power supply diversification initiatives?

Cape Town's power supply diversification initiatives include LPUs curtailment, Embedded IPP renewable energy, and a Dispatchable IPP Programme, among others. In addition, the city has rolled out a novel program named Power Heroes.

What are Cape Town's innovative energy initiatives?
