

A render of the Corby BESS project. Image: NextEra. NextEra Energy Resources (NEER) has become the next IPP to seek approval of a renewable energy development incorporating battery storage via the California ...

The California Energy Commission (CEC) has released its staff assessment for the Darden Clean Energy Project, a 2,300 megawatt (MW) solar and battery storage project ...

With dropping rooftop solar costs, members want to build them with battery systems and harness the excess power generated. Nationally, some utilities offer programs and incentives that grant ...

The California Energy Commission (CEC) has given the green light to the Darden Clean Energy Project (DCEP), now officially the largest battery energy storage system in the ...

Sacramento - A \$31 million grant from the California Energy Commission (CEC) will be used to deploy a cutting-edge, long-duration energy storage system that will provide ...

Sacramento - A \$31 million grant from the California Energy Commission (CEC) will be used to deploy a cutting-edge, long-duration energy storage system that will provide renewable backup power for the Viejas Tribe ...

Newly constructed commercial buildings in California are now required to add solar and battery storage systems. On January 1, 2023, the California Energy Code instituted the requirement, updating the Building ...

The California Energy Commission (CEC) approved the Darden Clean Energy Project, the first to be fast tracked under its Opt-In Certification program. The CES said that this battery storage project is destined to be the ...

PREFACE The California Energy Commission's (CEC) Energy Research and Development Division supports energy research and development programs to spur innovation in energy ...

SACRAMENTO - The California Energy Commission (CEC) has released its staff assessment, which includes a draft environmental impact report (EIR), for the Darden ...

As California rapidly increases its battery storage capacity, safety remains a top priority. In 2024, Governor Newsom launched a state-level collaborative aimed at enhancing ...

This expansion allows the CEC to oversee the permitting of clean and renewable energy facilities, including

solar photovoltaic, onshore wind, and energy storage systems, and facilities that produce or assemble clean energy technologies or ...

The total resource is up from 770 MW four years ago and double the amount installed just two years ago. Details of the energy storage fleet, a key component in the state's transition to 100 percent clean energy by ...

The California Energy Commission voted June 11 to approve the project, which includes a 1.15-GW solar facility and 1.15 GW of four-hour battery storage. The solar facility will consist of ...

The California Energy Commission (CEC) has adopted the 2022 Building Energy Efficiency Standards (Energy Code) for newly constructed and renovated buildings that say the new buildings need to be equipped with solar ...

0 1707 Representational image. Credit: Canva he California Energy Commission (CEC) has approved the landmark Darden Clean Energy Project (DCEP), set to become the ...
