

Michigan is at the forefront of deploying battery energy storage systems (BESS). In November 2023, it became the first Midwestern state to establish a statewide energy storage target, with ...

University of Wisconsin-Madison engineers are supporting a first-of-its-kind energy storage system in the United States that could come online as early as 2026 in Wisconsin's Columbia County. The project would be the ...

The Center on Global Energy Policy would like to thank the Global Carbon Capture & Storage Institute for their gift to CGEP in support of research related to this report. Contributions to ...

Alliant Energy's new battery system, known as the Columbia Energy Storage Project, would be the first-of-its-kind in the United States and represents a significant ...

Innovative energy storage technologies are required to decarbonize the electrical grid with stability. Both batteries and dense energy carriers have attracted vast research efforts as options for large-scale energy storage.

MADISON, Wis. (July 18, 2025) - Plans to construct the first long-duration energy storage system of its kind in the United States are advancing following approval from the Public Service Commission of Wisconsin (PSC). Alliant Energy's ...

Alliant Energy filed the project application with the PSC after securing a competitive cooperative agreement award from the U.S. Department of Energy's Office of ...

Columbia Electrochemical Energy Center (CEEC) CEEC focuses on strategies to address energy storage and conversion using batteries, fuel cells, and electrolyzers in transformative ways.

Research Renewable Energy has to be Stored. These Researchers are Figuring out How. Go behind the scenes at one of the Columbia Electrochemical Energy Center's labs, where researchers are developing the next generation of ...

The US Department of Energy's (DOE) Office of Clean Energy Demonstrations has awarded Alliant Energy a federal grant of up to \$30 million for the Columbia Energy Storage Project.

Development of the Columbia Energy Storage Project is being led by Alliant Energy in partnership with WEC Energy Group, Madison Gas and Electric, Shell Global Solutions US, Electric Power Research Institute, UW ...

Alliant Energy's new battery system, known as the Columbia Energy Storage Project, would be the first-of-its-kind in the United States and represents a significant advancement toward a more sustainable, reliable and ...

Development of the Columbia Energy Storage Project is led by Alliant Energy in partnership with WEC Energy Group, Madison Gas and Electric, Shell Global Solutions US, Electric Power ...

Columbia Energy Storage Project is being developed by a coalition including two other Wisconsin utilities, WEC Energy Group and Madison Gas & Electric, together with Shell Global Solutions and the US Electric Power ...

The Columbia Energy Storage Project in Wisconsin is set to become the first U.S. initiative to deploy a carbon dioxide (CO₂) battery system, marking a significant step in ...

The figure shows different market participation options from energy storage forms a frontier trading-off carbon emissions and consumer payments. The lower left direction represents cheaper and cleaner energy. With sufficient renewable ...
