

What is the most sustainable cycling clothing?

The most sustainable cycling clothing is that which is already in your wardrobe or which you can find second-hand. If you really do need something new, we've got the lowdown on the most sustainable brands to help you make a more conscious choice. Key things taken into consideration are:

Can you use heated clothing on a bike?

Rechargeable heated vests, gloves, socks, and insoles. You'll have to find another excuse not to ride! Everything is going electric these days. Even your bike's drivetrain. So why not add a touch of battery power to your cycling wardrobe? The motorcycle community has used heated clothing for years. It's about time cyclists caught on.

Should you buy cycling clothing?

When purchasing, remember your investment isn't restricted to cycling use only. The clothing can be useful for other outdoor activities or to just keep the chill away. Compare features and verify there is a warranty before purchasing. Stay warm out there!

Should you buy rechargeable heated clothing?

Rechargeable heated clothing will unlock additional months of cycling and you'll be in even better shape come spring. With so many heated garment brands and price points available on the market, we'll leave it up to you to find the one that best suits your needs and budget.

What e-bike gear should I buy?

From sturdy shoes and breathable shirts to weather-appropriate jackets and comfortable trousers, each piece plays a critical role. Remember, your e-bike gear is a reflection of you - it's worth investing in pieces that make you feel confident, comfortable, and ready for any riding adventure that comes your way.

Do e-bikers need rainwear?

When it comes to e-biking, the rain can certainly put a damper on your ride. But with the right rainwear, you can stay dry and comfortable even when the weather doesn't cooperate. From waterproof jackets to rain pants, there are plenty of options to choose from when it comes to rainwear for e-bikers.
