

Does building a storage station require qualifications

Does a self-storage facility fit into a zoning classification?

A self-storage facility usually doesn't fit into any of the general zoning classifications. It's advisable to visit the city hall and consult with your local planning department to determine which zoning classification your project will be under. Many self-storage facility projects usually fall under conditional use permits.

Do you need a Conditional Use Permit for a self-storage facility?

A self-storage facility project often falls under conditional use permits. These permits are subject to compliance with a set of rules and conditions in regard to building at your proposed site. The application for a conditional use permit is approved under a set of conditions which varies per jurisdiction.

Can self-storage be located within 3 miles of another storage facility?

No self-storage can be located within three miles of another storage facility. The maximum property coverage of the storage buildings and pavement is 50 percent. Self-storage can only be located in the industrial park zone. Only one building is permitted on a single parcel.

How many acres does a self-storage facility cover?

The average self-storage facility in many regions of the U.S. covers four acres or more. If raw land isn't available, converting existing buildings and businesses to storage is another viable option.

What zoning regulations affect a storage facility?

Here are just a few zoning regulations I've come across that can have a major impact on your facility's design or approval. Anyone of these (and many others) can require substantially more land or money than originally anticipated, so be prepared. No self-storage can be located within three miles of another storage facility.

How do I start a self-storage business?

One of the first steps to starting a self-storage business is getting a zoning permit. Building and developing a self-storage facility is a rigorous process with many considerations.
