

In autumn 2024 two draft regulations were published regarding state aid for large-scale electricity storage systems (BESS), one from the Modernisation Fund ("MF ") 1 - and the second under the National Recovery ...

The project will leverage advanced solar technologies, including photovoltaic panels and battery storage systems, ensuring a stable and efficient energy supply tailored to ...

The rapid growth in the energy storage market continues to drive demand for project financing, and like any other project-financed asset class, lenders will analyze both the amount and ...

Bonus will help boost American manufacturing of solar wafers and other components critical for U.S. energy security WASHINGTON - Today, the U.S. Department of the Treasury (Treasury) and Internal Revenue Service ...

The Energy Storage Roadmap was reviewed and updated in 2022 to refine the envisioned future states and provide more comprehensive assessments and descriptions of the progress needed ...

In our view, there is a need for greater collaboration between sponsors developing the batteries, regulators and national policymakers setting renewable targets, and the financing community ...

The Inflation Reduction Act of 2022 (IRA) is the most significant climate legislation in U.S. history. IRA's provisions will finance green power, lower costs through tax credits, reduce emissions, and advance environmental justice.

Executive Summary The Indian renewable energy sector has witnessed unprecedented growth in the past decade, rivalling capacity additions anywhere in the world. The country has had the ...

Energy Storage Finance & Investment 2025 brings together the entire storage community, including the country's leading developers, tax equity investors, capital and debt ...

Enter pumped hydropower storage (PSH), the "Swiss Army knife" of energy grids. While solar panels nap at night and wind turbines catch their breath, PSH acts like a ...

Foreword As part of the U.S. Department of Energy's (DOE's) Energy Storage Grand Challenge (ESGC), DOE intends to synthesize and disseminate best-available energy storage data, ...

This impacts cost and terms of financing, and depending on severity of risk, may even limit access to available

finance. It also impacts the realizability of the project pipeline as many ...

On January 16, 2025, the U.S. Department of the Treasury and IRS released updated guidance known as the First Updated Elective Safe Harbor on the domestic content bonus credit. This guidance modifies Notice 2024-41 from ...

This chapter analyzes Bolivia's pathway toward energy transition within the Latin American context, where each country's approach varies based on unique resources and ...

There are several types of energy storage technologies that can be employed to support Bolivia's energy transition, including batteries, pumped hydro storage, and thermal energy storage.

Energy Storage Financing The Energy Storage Financing study series is an outreach effort to the financial industry to help reduce and mitigate the risk of investing in energy storage ...
