

# Energy storage 2024 subsidy application process

What are energy storage subsidy programs?

Energy storage subsidy programs are an important step in modernizing Polish agriculture, increasing the share of RES and improving the energy stability of farms. BGK's Energia Plus Program and Ecological Credit offer extensive support for businesses investing in energy storage facilities between 2024 and 2025.

Will energy storage subsidy programs accelerate Poland's energy transition?

The development of energy storage subsidy programs in 2024-2025 has great potential. The planned activities will accelerate Poland's energy transition, supporting the development of technologies and the creation of new jobs in the energy sector. Energy storage subsidy programs are crucial to stabilizing Poland's electricity grid.

What are the application deadlines for the energy storage program?

Application deadlines: Call for applications begins: September 2, 2024. End of call for proposals: December 20, 2024 or until funds are exhausted. The program introduces significant changes compared to previous editions. The installation of energy storage or heat storage is required for installations submitted from August 1, 2024.

How much money does the prosumer Energy Program provide for 2024-2029?

The program's budget for 2024-2029 is 400 million zlotys, underscoring the commitment to prosumer energy development. In 2025, the continuation of the program will enable more households to invest in modern energy technologies. The program provides subsidies of up to PLN 17,000 for electricity storage facilities.

How will the energy storage industry evolve in 2024-2025?

A rapid increase in the number of energy storage installations is expected in 2024-2025. This will be an important step in modernizing the Polish energy sector and strengthening the position of prosumers in the market.

How much PLN can a storage facility get subsidized?

The program provides subsidies of up to PLN 17,000 for electricity storage facilities. The minimum storage capacity eligible for support is 2 kWh, with a maximum subsidy of PLN 6,000 per kWh. Such support provides a strong incentive to invest in these technologies.
