

What are energy storage stocks?

Energy storage stocks are companies that produce or develop energy storage technologies, such as batteries, capacitors, and flywheels. These technologies can store energy from renewable sources like solar and wind power, or from traditional sources like coal and natural gas.

Is the midstream sector benefiting from increased natural gas demand?

The midstream sector is benefiting from increased natural gas demand. There are several strong stocks in the space with yields between 4% and 10%. Not only do these stocks have high yields, but their distributions are also well covered and rising.

Are energy storage stocks a good investment?

Currently, energy storage stocks are a relatively safe investment to make for the future, and if trends hold, they have solid potential for growth. However, if this doesn't appear to be a good fit for your investment portfolio, then it's best to look at other options.

Is Bloom Energy a good energy storage stock?

Bloom Energy is one of the smaller picks on this list, but it may be the most dynamic energy storage stock out there. It specializes in advanced fuel cell energy platforms, which use a proprietary solid oxide technology to convert natural gas, biogas or hydrogen into electricity with low or even zero carbon emissions.

Is Western Midstream Partners (Wes) a good stock to buy?

Western Midstream Partners (WES 0.59%) offers a huge 9.4% yield and backs it up with a rock-solid balance sheet. Its leverage ratio sits below a multiple of 3, and its cash flows are anchored by cost-of-service contracts and minimum volume commitments. That makes for consistent results, even in choppy markets.

Is Enphase Energy a good stock to buy?

When you combine it with its growth prospects, it appears to be a good company to buy amid the present stock market downturn. Enphase Energy is a leading provider of solar energy storage systems for homes and businesses and is also considered one of the top renewable energy stocks.
