

What is long duration energy storage (LDEs)?

No events are available at this time. The Long Duration Energy Storage (LDES) program invests in projects that accelerate the implementation of long duration energy storage solutions to increase the resiliency and reliability of our energy infrastructure and meet the state's energy and climate goals.

Does Green Mountain Power offer energy storage?

In fact, Green Mountain Power offers a few different programs for energy storage: a bring-your-own-device program that provides a rebate for whatever battery you want to install, as well as a Tesla Powerwall Pilot program. Did you find this page helpful?

Can I use load-shifting if I install energy storage?

If you install energy storage, you can also take advantage of load-shifting to maximize your energy consumption during off-peak pricing and benefit from Time-of-Use (TOU) pricing control. How do I apply? Visit the SCE Battery Marketplace to explore your options with approved vendors.

What is G1.1.3 energy storage systems?

The "G1.1.3 Energy Storage Systems" programme is being developed to support lithium-ion technology for energy storage and power off-take facilities connected to the national grid. According to the Draft RRP Regulation:

Do I NEED Solar to qualify for energy storage?

No, you do not need to have solar to qualify for this program. Energy storage allows for self-supply during outages for added resiliency. If your main electrical panel is configured to only have critical load (e.g., a few lights, refrigerator, A/C) on, your energy storage system will last longer.

Do SGIP projects need a demand response program?

Yes, all new SGIP projects must enroll in a qualified Demand Response Program: To enroll you may email CPPsupport@sce.com with your name, address, and contract number, or call 1-800-655-4555 for assistance. To learn more, visit sce.com/CPP and Demand Response Programs for Homes.
