What is the energy storage program?

The Energy Storage program provides operational support to clients by working with World Bank teams to advance the IDA20 Energy Policy Commitment of developing battery storage in at least 15 countries (including at least 10 fragile and conflict-affected situations).

What is the energy storage Academy?

The Energy Storage Academy was established to create a space for knowledge-sharing on energy storage. The academy is the platform which disseminates to World Bank clients the knowledge generated by the different working groups of the ESP. During 2020 and 2021, 39 countries participated and 16 have projects receiving WB support.

What is energy storage technology?

Proposes an optimal scheduling model built on functions on power and heat flows. Energy Storage Technology is one of the major components of renewable energy integration and decarbonization of world energy systems. It significantly benefits addressing ancillary power services, power quality stability, and power supply reliability.

Where will energy storage be deployed?
