

# Energy storage welcomes another major policy

What are the different types of energy storage policy?

Approximately 16 states have adopted some form of energy storage policy, which broadly fall into the following categories: procurement targets, regulatory adaption, demonstration programs, financial incentives, and consumer protections. Below we give an overview of each of these energy storage policy categories.

What is a storage policy?

All of the states with a storage policy in place have a renewable portfolio standard or a nonbinding renewable energy goal. Regulatory changes can broaden competitive access to storage such as by updating resource planning requirements or permitting storage through rate proceedings.

What is the energy storage strategy & roadmap (SRM)?

WASHINGTON, D.C. - The U.S. Department of Energy (DOE) today released its draft Energy Storage Strategy and Roadmap (SRM), a plan that provides strategic direction and identifies key opportunities to optimize DOE's investment in future planning of energy storage research, development, demonstration, and deployment projects.

What is the Maryland energy storage program?

The new law requires the Maryland Public Service Commission to establish the Maryland Energy Storage Program by July 1, 2025 and provides for incentives for the development of energy storage. Procurement targets are beneficial in that they provide supportive signals for investors and reduce regulatory uncertainty.

What is the energy storage Grand Challenge (ESGC)?

In January 2020, DOE launched the Energy Storage Grand Challenge (ESGC) to facilitate a department-wide strategy to accelerate the development, commercialization, and use of next-generation energy storage technologies and sustain American global leadership in energy storage.

What is the energy storage SRM?

Specifically, the draft Energy Storage SRM updates the earlier ESGC Roadmap in consideration of the progress made across the energy storage sector since 2020, as well as reflects DOE's recent activities in support of its energy storage mission and vision.

The US PV market is undergoing major policy changes, with the most significant shift stemming from the anti-dumping and countervailing duties (AD/CVD) on PV modules and ...

A single policy to support energy storage would not capture the environmental benefits of storage development. Instead, the current need is to devise a bundle of policies that ...

# Energy storage welcomes another major policy

The first stop in the Coachella Valley hearing was the Desert Peak battery storage project in Palm Springs, by NextEra Energy Resources. It's silhouetted against the San ...

EASE welcomed the policy developments, but noted that much more remains to be done to craft the right energy storage market conditions for the EU. In the past few days, ...

Around 16 states have implemented some form of policy directed at energy storage, which broadly fall into five categories: procurement targets, regulatory adaptation, ...

A policy primer exploring how energy storage technologies work, the benefits that storage can deliver to the electric grid, the current legal and regulatory barriers to ...

The policy changes for solar and wind, major drivers for the adoption of energy storage, present another challenge and the industry can expect to see a major buildout in the ...

The 2025 national energy storage policy affects everyone from EV owners to solar panel enthusiasts. This isn't just government jargon; it's about how we'll keep the lights ...

Regulatory adaption is another key component of energy storage policy, involving changes to state energy regulations that create opportunities for storage. All states ...

Japan Gas Association welcomes draft Strategic Energy Plan: Japan's Ministry of Economy, Trade and Industry (METI) has released a draft energy plan that targets ...

This table includes all existing state energy storage procurement mandates, targets, and goals. These terms describe various ways states may set an intention to attain a specified level of ...

The Energy Storage Coalition welcomes the report on the Electricity Market Design adopted on 19 July 2023 by the European Parliament, as it sends a strong political signal on the importance of ...

This is an extract from a recent report "Charging Up: The State of Utility-Scale Electricity Storage in the United States" by Resources for the Future. As the electricity sector ...

ESS policies have been proposed in some countries to support the renewable energy integration and grid stability. These policies are mostly concentrated around battery ...

The upcoming IESW (India Energy Storage Week) 2025 is projected to attract over 200 domestic passenger car manufacturers and international electric vehicle (EV) makers ...

This SRM does not address new policy actions, nor does it specify budgets and resources for future activities.

## **Energy storage welcomes another major policy**

This Energy Storage SRM responds to the Energy Storage Strategic Plan ...
