

# Expected ROI of business energy storage project in Romania 2025

How much money will be invested in Romania's energy sector?

Today, the Minister of Energy, Sebastian Burduja, announced on Facebook that an additional EUR150 million will be invested in Romania's energy sector. "I am pleased to announce that the Ministry of Energy is launching a new call for projects financed through the Modernization Fund, aimed at investments in energy storage capacities (batteries).

Which Romanian companies are adding Bess to their renewable assets?

Other Romania-based companies, such as Parapet and Waldevar Energy, have told pv magazine that adding BESS to their renewable assets is a top priority. The May edition of pv magazine features an in-depth look at Romania's solar and energy storage markets.

How much money is needed for energy storage projects in Romania?

The projects must focus on building new energy storage capacities in Romania," the minister stated. According to the minister, as quoted by ZF.ro, the total budget for this state aid scheme is EUR150 million in non-reimbursable funds sourced from the Modernization Fund.

How much energy does Romania have in 2025?

At the beginning of 2025, Romania boasts approximately 3,000 MW in wind energy and 1,500 MW in solar energy. An additional 2,424 MW in wind and solar projects is expected to be operational in 2025, attracting over EUR2 billion in investments. Romania's Energy Goals for 2030: Achieve over 32,000 MW in total capacity by 2030.

Is Romania a Bess market?

"As other European BESS markets become increasingly saturated, Romania stands out," said Evangelos Gazis, Aurora's head of Southeastern Europe, adding that the investment case for storage is strengthened by wind and solar's rapid expansion driving high volatility in wholesale and balancing markets. Interesting activity

Is the Bess market heating up in Romania?

The BESS market in Romania is heating up, say local analysts and insiders. Irene Mihai, policy officer at the Romanian Photovoltaic Industry Association (RPIA) recently told pv magazine that a realistic target for the utility-scale BESS segment in Romania "would be around 2 GWh (around 1 GW of installed capacity)" for 2030.

Several key factors influence the ROI of a BESS. In order to assess the ROI of a battery energy storage system, we need to understand that there are two types of factors to keep in mind: ...

# Expected ROI of business energy storage project in Romania 2025

Trina Storage is set to supply a 65MWh battery energy storage system (BESS) for a new project in Romania, marking its first deployment in the country. The initiative, located ...

EPG is an independent, non-profit think tank focused on energy and climate policy in Romania and the European Union. Founded in 2014, EPG operates as a policy research institute primarily financed through competitive grants, ...

The energy storage landscape is changing quickly as scientists work to create better and longer-lasting storage solutions. Experts are focused on improving smart grids to ...

Romania has allocated EUR 80 million under its National Recovery and Resilience Plan for an energy storage programme expected to award 1.8 GW of capacity Up to EUR 300 million will be disbursed through the ...

Romania Energy Storage Market Challenges In the Romania Energy Storage Market, key challenges include regulatory uncertainty, limited infrastructure for energy storage ...

Looking ahead: Keys to success Several factors will define the energy storage market in 2025: the continued dominance of LFP chemistry and its downward impact on pricing, increased utility demand for integrated ...

The energy storage landscape is changing quickly as scientists work to create better and longer-lasting storage solutions. Experts are focused on improving smart grids to ensure that electricity systems work well and are.

With developers continuing to add new capacity, including 9.2 GW of new lithium-ion battery storage capacity in 2024 through November 2024 and comparable levels of growth expected ...

In recent years, multinational capital investment in Romania's new energy sector has grown significantly, and is expected to lead 1.2-1.5GW of integrated landscape and storage projects in 2025, as well as promote the ...

Author: George HACERIAN, Research Analyst, Green eDIH As climate change becomes increasingly evident, Romania is strengthening its efforts to enhance resilience and ...

As Europe accelerates its energy transition, battery energy storage systems (BESS) are playing a growing role in grid flexibility and renewable integration. Over the past ...

Among the 39 projects is the installation of at least 1,500 MWh of battery storage systems in existing renewable energy plants in Romania. These projects will help ...

Energy storage deployment across North America broke records in 2024, driven by falling battery prices, increased system efficiencies, and growing market opportunities. Globally, energy storage deployment increased ...

## **Expected ROI of business energy storage project in Romania 2025**

In a decisive move to support its clean energy transition, Romania has overhauled a key regulatory barrier holding back investment in energy storage. The National Energy Regulatory Authority (ANRE) announced ...

Romania currently has almost 400 MWh of total operational battery storage capacity, according to data from the transmission system operator Transelectrica, and a ...
