

Expected ROI of enterprise ESS system project in Singapore 2026

Can industry-led research and development drive ESS in Singapore?

To overcome these hurdles, the Energy Market Authority (EMA) is inviting proposals for industry-led projects that drive research and development (R&D) to address the challenges and facilitate the wider deployment of ESS in Singapore, fostering the growth of sustainable energy storage solutions.

Does Singapore need a wider deployment of ESS?

However, Singapore critically needs the technology and the innovative urban deployment topologies that can enable a wider deployment of ESS to match the rise of renewable energy to meet the ever-increasing energy demand. In Q4 2023, the EMA had put out a grant call to invite proposals for facilitating the wider deployment of ESS in Singapore.

How long does it take to build ESS in Singapore?

According to Sembcorp, it is also the fastest ESS of its size to be built and deployed in the world, taking just six months to complete. Aside from contributing to global sustainability, the ESS will also diversify Singapore's energy sources and drive down energy bills, which many of Singapore's poor are struggling to pay in a post-pandemic world.
