

# Expected ROI of rooftop solar battery project in Indonesia 2026

How many MW of rooftop solar will Indonesia deploy in 2024?

The Ministry of Energy and Mineral Resources in Indonesia has set a quota of 5,746 MW of rooftop solar to be deployed between 2024 and 2028.

Does Indonesia have a quota for rooftop solar?

Indonesia's Ministry of Energy and Mineral Resources (EMR) has set a quota for the development of rooftop solar by state-owned electric utility Perusahaan Listrik Negara (PLN) through 2028. The distribution of rooftop solar quotas in Indonesia is based on the electric power system. Between 2024 and 2028, a quota of 5,746 MW has been set.

Why is the number of rooftop photovoltaic systems increasing in Indonesia?

The number of rooftop photovoltaic (PV) systems in Indonesia has increased massively following the implementation of the net-metering (NEM) scheme. However, it is still below the target due to high investment costs and low electricity prices.

Does Indonesia support rooftop solar PV?

Timeline of rooftop solar PV policies in Indonesia. The MEMR cooperated with the United Nations Development Program (UNDP) in Indonesia to support rooftop PV implementations and introduced an incentive program for rooftop PV systems.

When did Indonesia regulate rooftop solar energy based on a ceiling price?

The most recent regulation is solar energy based on a ceiling price. Indonesia began to regulate rooftop PV systems in 2013 through the PLN Regulation No. 0733 of 2013.

Will PLN change the rooftop solar PV market in Indonesia?

Since nearly all Rooftop Solar PV systems in Indonesia (particularly those involving PLN) currently operate on a net-import basis, in practice, the impact of this change on the existing market should be relatively minimal. Nonetheless, this is a new restriction on the future potential of the Rooftop Solar PV sector in Indonesia. 3. Capacity Charge

Following the issuance of Minister of Energy and Mineral Resources (MEMR) Regulation No. 2 of 2024 (MEMR 2/2024) earlier this year as the new regulatory framework for ...

Indonesia has unveiled its updated National Power Supply Plan (RUPTL), projecting an additional 71GW of installed capacity over the next decade, with a focus on solar, hydropower, and geothermal energy to drive ...

Discover the remarkable return on investment (ROI) of solar panels and how they can save the planet and your

# Expected ROI of rooftop solar battery project in Indonesia 2026

wallet. By harnessing the power of the sun, homeowners can generate clean, renewable energy that ...

In the UK, an increasing number of households are opting for rooftop solar panels, driven by feed-in-tariffs and other attractive incentives. As the interest in solar panels grows among homeowners, businesses, and ...

Interested parties will be holding their breath hoping that the desired capacity for their projects remains available when submitting their application as they would otherwise have ...

Solar Installed System Cost Analysis NREL analyzes the total costs associated with installing photovoltaic (PV) systems for residential rooftop, commercial rooftop, and utility-scale ground-mount systems. This work has ...

This decision is expected to "seriously undermine the economic viability of rooftop solar PV systems, especially residential solar PV systems," according to Winofa.

The matter of solar farms or rooftop solar is more makes better economy sense; depends on the power location and the scope of solar panel to be used. The solar farms are ...

The distribution of rooftop solar quotas in Indonesia is based on the electric power system. Between 2024 and 2028, a quota of 5,746 MW has been set. This breaks down into 901 MW in 2024, 1,004 MW in 2025, 1,065 ...

Additionally, policy changes from the Ministry of Energy and Mineral Resources are expected to add over 5 GW of rooftop solar capacity within five years. The report indicates that as of August 2024, there are 16.92 GW of ...

It is a document that provides developers, banks and installers a clear and holistic view on the economics of solar rooftop, the viability of the photovoltaics technology, and the ease of ...

India's rooftop solar initiative PM Surya Ghar Yojana is rapidly transforming the country's energy landscape as it is on track to install over 10 lakh by March 2025. In a statement, the Ministry of New and Renewable Energy ...

In this article, we'll break down the costs and ROI of solar panels in the UK, exploring the factors that can impact the financial viability of solar energy investments.

Singapore-based developer Vena Energy says it will investigate opportunities to make solar panel components and battery energy storage systems in Indonesia, in order to support a hybrid ...

Solar Levelized Cost of Energy is influenced by a multitude of factors such as investment costs for material

## **Expected ROI of rooftop solar battery project in Indonesia 2026**

and product, operational and maintenance costs, solar cell lifetime, degradation, as ...

We found out that residential rooftop solar technical potential in Indonesia amounts to 194 - 655 GWp. And by considering homeowners assumed to have financial capacity to install rooftop solar, 17.8% of the potential can be ...
