

# Expected ROI of wall mounted battery project in France 2026

Where is Alpiq's battery energy storage project located?

Alpiq, a Switzerland-based electricity producer, announced the acquisition of the 100 MW/200 MWh battery energy storage project located in the department of Oise, north of Paris, France from Harmony Energy, a renewable energy project developer. The project is expected to be commissioned in autumn 2026.

Is flexibility a good investment in France for grid-scale battery projects?

Aurora Energy Research has published a flexibility market report showing a significant improvement in market conditions in France for grid-scale battery projects

When will AFRR capacity market reopen in France?

On June 19, 2024, France adopted a pay-as-you-go mechanism for its aFRR capacity market, which has significantly boosted short-term revenues. Aurora expects high prices in the aFRR market to persist until 2028, stabilizing in 2030.

Will AFRR prices continue to rise in 2028?

Aurora expects high prices in the aFRR market to persist until 2028, stabilizing in 2030. Along with an increase in the price differentials in the spot market, driven by higher gas prices, these factors have resulted in an increase of more than 2% in the IRR for battery projects with a commercial operation date in 2025.

Will high-consumption batteries benefit from higher import tariffs?

Aurora estimates an additional 2% increase in IRR above the reference case, driven by consumption during peak production periods. However, batteries located in high-consumption areas are not expected to experience significant benefits, as higher import tariffs would offset revenues during peak hours.

Will AFRR capacity prices increase 2%?

The report predicts an increase of more than 2% in the internal rate of return (IRR) for investment scenarios, driven by high aFRR capacity prices in the short term and greater energy trading opportunities.
