

Georgia energy storage battery project transfer

What is Georgia Power's 530-megawatt battery storage system?

Georgia Power breaks ground at the McGrau Ford Battery Facility in Cherokee County on April 4, 2025. This 530-megawatt battery energy storage system will consist of two phases, approved in the 2022 Integrated Resource Plan (IRP) and 2023 IRP Update. Courtesy: Georgia Power.

How many MW of new battery energy storage will be available?

An additional 1,000 MW of new battery energy storage is expected to be procured in the coming years through competitive bidding processes and a 13 MW demonstration project is in development at Fort Stewart Army Installation near Savannah, Georgia.

What are Georgia Power's new projects?

The new projects follow the company's first-ever BESS facility at Mossy Branch near Columbus, which entered service last year (read more here). Hammond Groundbreaking - Georgia Power hosts company and project leaders, as well as state and local elected officials, for a groundbreaking ceremony at the Hammond Battery Facility on April 18, 2025.

What does Georgia Power do?

"At Georgia Power, we work with the Georgia PSC and many other stakeholders to make the investments required for a reliable and resilient power grid, integrating new technologies to better serve our customers today and as Georgia grows," said Rick Anderson, senior vice president and senior production officer for Georgia Power.

Why is battery storage important?

Because battery storage can provide stored energy to the grid for hours on demand, BESS resources enhance the overall reliability of the electric system.

US-based electric utility Georgia Power has commenced construction of new battery energy storage systems (BESS) across the state of Georgia, totalling 765MW capacity. ...

2024; Flatiron Energy has secured \$540 million in financing for its Taft Project, set to become Massachusetts' largest battery energy storage system. The 200MW / 800MWh facility ...

Georgia Power and state regulators reached a tentative agreement last week to expand Georgia Power's fossil fuel infrastructure and increase the company's battery storage ...

Georgia Power recently announced that construction is underway for four new battery energy storage systems in strategic counties across the state to support energy ...

Georgia energy storage battery project transfer

ATLANTA - Georgia Power will build battery energy storage systems (BESS) at four sites across the state, adding 500 megawatts of electrical generating capacity to help meet ...

Battery energy storage is taking center stage in Georgia's utility planning, as Georgia Power moves forward with more than 765 megawatts of new storage capacity across ...

Georgia Power has initiated construction on new battery energy storage systems totaling 765 megawatts across four counties in Georgia. These projects aim to enhance the reliability of the ...
