

# Government procurement price of industrial energy storage in Australia

How is energy stored in Australia?

Currently storage of electrical energy in Australia consists of a small number of pumped hydroelectric facilities and grid-scale batteries, and a diversity of battery storage systems at small scale, used mainly for backup. To balance energy use across the Australian economy, heat and fuel (chemical energy) storage are also required.

How many large-scale energy storage projects are there in Australia?

The report identifies 55 Australian large-scale energy storage projects which are either existing, planned or proposed. Excluding pumped hydro, these represent over 4 GWh of storage. 9 gigawatts (GW) of capacity have been completed, planned or are in the pipeline. Of those, 19 have been completed and another 36 have reached financial close.

Does CIS support energy storage tenders in NSW?

ocusing on energy storage (batteries). Phase one of the CIS has supported tenders in NSW for just over 1 GW of storage from six projects, and a tender proce

How many energy storage systems are there in Australia?

There is no national register of energy storage systems in Australia, making it difficult to estimate the number of energy storage systems. This analysis is based on existing Clean Energy Regulator data, a national survey by the Smart Energy Council, interviews with energy market participants and a comprehensive literature review.

How many GW of battery energy storage capacity is in the pipeline?

16 GW of battery energy storage capacity is in the NEM pipeline to the end of 2027, a quarter of which has a long-term government-backed revenue guarantee. This is through either the Capacity Investment Scheme (CIS) or a Long-term Energy Supply Agreement (LTESA).

Do energy storage projects rely on government subsidies?

number of global and Australian storage projects have relied on government subsidies (eg. Hornsdale Power Reserve), which is not surprising given the nascent state of the energy storage market. This paper refers only to utility scale energy storage systems.

**Key Takeaways** Wholesale electricity prices in Australia fluctuate due to supply-demand dynamics, fuel costs, and government policies. Charts and data visualisations help track trends and identify strategic procurement windows. ...

While the business case for energy storage is compelling over the long term, doing anything for the first time

# Government procurement price of industrial energy storage in Australia

is difficult, time-consuming and often expensive. Government support for energy ...

The NSW government has launched its sixth Electricity Infrastructure Roadmap tender, seeking 1 GW of new LDES projects to boost electricity reliability as the state's coal-fired power generators shut down. ...

The scheme will underwrite new zero-emissions storage in Australia, including big batteries, hydrogen, and pumped hydro, to incentivise and accelerate projects as coal plants rapidly retire.

Australian Government commitment for non-corporate Commonwealth entities to source 20 per cent of procurement by value from small and medium enterprises (SMEs) Indigenous ...

The Australian Battery Energy Storage Systems (BESS) market has attracted significant investment interest due to its crucial role in supporting renewables penetration and ensuring ...

Australia's Energy Storage market growth has been reliant on government support and this pace is likely to continue. However, over 50% of the currently connected batteries have required ...

Introduction Australia's push towards renewable energy has seen a sharp increase in utility-scale Battery Energy Storage Systems (BESS) projects. In 2023, Australia saw the strongest year for new financial commitments in large ...

Australia's CIS redesign reflects a maturing energy procurement framework that prioritizes speed, transparency, and systemic value. By coupling procedural reform with a ...

Energy and climate-related policies have been accelerated by both state and federal governments, and for many companies the time feels right to invest in energy storage. This event gathers together investors, developers, IPPs, grid ...

All government agencies subject to the QPP will, to the maximum extent practical and consistent with competition law, provide information about renewable energy-related supply opportunities, ...

Whole of Government coordinated procurement arrangements are established for a number of reasons, including to give effect to policy decisions, to collectively procure goods and services ...

These programs build on existing efforts through New Energy Apprenticeships, Critical Minerals Trade Enhancement Initiative and more. The strategy is part of the Australian Government's ...

The Australian Energy Market Operator (AEMO) Services has revealed that nearly 14GWh of long-duration energy storage (LDES) projects were successful in the latest New South Wales Roadmap competitive tender.
