

# Government procurement price of utility scale ESS in Germany

Why do we need energy storage systems in Germany?

Increasing the share of renewables poses new challenges: Excess energy produced during off-peak hours needs to be stored and made available when needed. Since energy storage systems (ESS) can balance supply and demand, they are an essential part of Germany's energy transition. In line with this, the market for ESS is constantly growing.

Why does BW ESS invest in Germany?

The expanded footprint in Germany reinforces BW ESS' commitment to unlocking the value of energy storage", said Roberto Jimenez, Executive Director, BW ESS. Germany is Europe's largest and most liquid power market. It ranks among the top three most attractive European markets for BESS investment, alongside Italy and Great Britain.

What does BW ESS stand for?

16 April 2025, Zurich / Berlin - BW ESS and Zelos Energy Developments today announce that they are working on advancing a 1.5 GW portfolio of utility-scale battery energy storage system (BESS) projects in the federal states of Mecklenburg-Vorpommern and Sachsen-Anhalt in Northeast Germany.

Why is BW ESS expanding its footprint in Germany?

The expanded footprint in Germany reinforces BW ESS' commitment to unlocking the value of energy storage", said Roberto Jimenez, executive director, BW ESS. According to Aurora Energy Research, Germany is Europe's largest and most liquid power market.

Who is BW ESS?

Part of BW Group, BW ESS can leverage a global industry network, as well as decades of experience in energy infrastructure investment, delivery, and operation. Zelos Energy Developments is an energy project- and asset developer based in Berlin, Germany.

How much does electricity cost in Germany?

The average price came in at EUR0.0466 (\$0.0532)/kWh, with final prices ranging from EUR0.0399/kWh to EUR0.0488/kWh. From a regional perspective, the largest volume awarded was in Bavaria (607 MW), followed by Brandenburg (367 MW) and Lower Saxony (315 MW).

BW ESS and Zelos Energy Developments today announce that they are working on advancing a 1.5 GW portfolio of utility-scale battery energy storage system (BESS) projects ...

Reflecting on recent market trends, the cost of lithium carbonate and ESS bidding prices have remained at a low point, fostering an advantageous environment for heightened ...

# Government procurement price of utility scale ESS in Germany

Search all the commissioned and operational GUSESS projects, bids, RFPs, ICBs, tenders, government contracts, and awards in Germany with our comprehensive online database.

Germany, Europe's largest power market, ranks among the top three countries for BESS investment. The federal government is introducing reforms to support battery storage, including changes to grid fees, permitting, ...

Currently, utility-scale batteries in Germany can leverage the three most prevalent, well-established revenue streams: wholesale market arbitrage, ancillary services, ...

From ESS News German solar trade body BSW-Solar expects the capacity of large battery storage systems installed in Germany to increase fivefold by 2026. With 1.8 GWh ...

In Germany, Aquila Clean Energy is developing a large portfolio of battery storage projects consisting of 45 - 85 MW projects with two-hour storage duration, marking Aquila Clean ...

Small-scale systems in the country have proliferated as part of a need to offset very high electricity prices and provide security, with recent data from the German Solar Industry Association (BSW-Solar) suggesting around ...

In contrast, the expansion of large-scale battery storage systems in Germany is also a goal of the federal government for the coming years. Large-scale battery storage systems (> 1 MWh capacity) are currently ...

Doing business with ESS ESS welcomes new suppliers who can offer products and services at competitive prices. This page serves as an overview of the entry points to ESS, providing guidance on how companies can become suppliers to ...

From ESS News German solar trade body BSW-Solar expects the capacity of large battery storage systems installed in Germany to increase fivefold by 2026. With 1.8 GWh of capacity installed to date ...

While Germany's battery energy storage sector is booming, developers should be aware of the various hurdles to overcome and could learn lessons from the United Kingdom ...

Our analysis indicates that power purchase agreement (PPA) prices are not expected to decrease significantly in the foreseeable future. PPA tailwinds include record-low solar module prices and a more favorable interest ...

With the large-scale battery energy storage system (BESS) fleet in Germany on the verge of unprecedented expansion, a new partnership is aiming to tap the energy storage potential of the country's south.

## **Government procurement price of utility scale ESS in Germany**

The utility-scale ESS market in India saw its first installation with a pilot project by Power Grid Corporation of India in 2017 in Puducherry. It was set up with a capacity of 500 Kilowatt-hour ...

German energy storage sales are shrinking, especially home systems, but commercial and industrial (C& I) and utility-scale numbers are rising and the Federal Association of Energy Storage Systems (BVES) wants faster ...
