

# Home energy storage project financing options in Guernsey 2026

What is the energy strategy for Guernsey?

The Electricity Strategy for Guernsey covers the period up to 2050. The Committee for the Environment & Infrastructure considered several different ways in which Guernsey could meet its future demand including solar, wind, tidal, additional interconnectors, energy storage and alternative fuels.

Should Guernsey have solar farms?

In response to calls for solar farms in Guernsey, Little Green highlights the potential of brownfield developments for sustainable energy while advocating rooftop solar as the island's primary path to net-zero. They emphasize the need for environmentally responsible solutions, like agrivoltaics, to balance energy generation with land use.

Does project finance apply to energy storage projects?

The general principles of project finance that apply to the financing of solar and wind projects also apply to energy storage projects. Since the majority of solar projects currently under construction include a storage system, lenders in the project finance markets are willing to finance the construction and cashflows of an energy storage project.

What is Guernsey's energy policy?

The main work streams within this policy are the formulation of an overarching Energy Policy for Guernsey which will inform future work in relation to the supply of hydrocarbons and the use of renewable energy.

Does Guernsey need a green economy?

It is essential that Guernsey can manage its own transition to a green economy effectively and so a strategic direction must be set, along with a market structure that supports this, and provide certainty to the energy industry. The Electricity Strategy was approved by the States of Deliberation in September 2023. What was proposed?

What is the Guernsey hydrocarbons supply programme?

The Guernsey Hydrocarbons Supply Programme (GHSP) began in earnest in December 2016 and is intrinsically linked to Energy Policy. Phase 1a of the GHSP assessed the risks identified within the current hydrocarbons supply chain, identified Guernsey's future demand and requirements, and identified a long list of options for the future.
