

Is energy storage required in India?

the actual requirement of energy storage in India. The time required for obtaining the approval till the commissioning of projects is prolonged which results in significant cost overrun. To assess this, few case studies has been mentioned in the paper to understand

What are the major geohazards affecting pumped hydro storage projects in India?

truction of pumped hydro storage projects in India. Unforeseen geohazards such as landslides, earthquakes, or unstable rock formations, poor soil conditions, water scarcity, changes to water flow patterns, erosion, and effects on regional ec systems, are some of the major geological concerns. The recent crisis at Joshimath, Uttarakhand has bee

Can India tapped the water supply potential of J&K?

This potential cannot be tapped unless India increases its storage capacity and redirects surplus flow from J&K to Punjab, Haryana and Rajasthan. Work on Tulbul project on Jhelum, suspended since 1986, will help as the accompanying barrage will have a storage capacity of around 0.3 MAF of water.

Standalone Energy Storage Systems (ESS) are rapidly emerging as a key market, with 6.1 gigawatts of tenders issued in the first quarter of 2025 alone, accounting for 64% of the total utility-scale energy storage ...

Context: As India moves ahead with increasing shift towards renewable energy sources like solar and wind. There has been a greater focus on developing battery storage systems, which can store electricity. In this respect, ...
