

By Mark Shenk Industry Insight from Reuters Events, a part of Thomson Reuters. Summary Falling costs and federal tax credits have improved the economics of large-scale battery storage but a busy market brings grid, ...

The US energy storage market is expected to grow further in 2025, with a projected 15 GW of new installations following last year's record 12.3 GW, though uncertainty ...

The US energy storage industry saw its highest-ever first-quarter deployment figures in 2024, with 1,265MW/3,152MWh of additions across all market segments. According to the Q2 2024 edition of the US Energy ...

WASHINGTON, D.C., April 29, 2025 - Today the American Clean Power Association (ACP), on behalf of the U.S. energy storage industry, announced a historic commitment to invest \$100 billion into building and buying American ...

2024 was another banner year for a source of electricity that is better for people's lungs, better for climate change and may be reaching your home now when you turn ...

WASHINGTON, D.C., April 29, 2025 - Today the American Clean Power Association (ACP), on behalf of the U.S. energy storage industry, announced a historic commitment to invest \$100 ...

1 ?· Data centers" energy demand is well-documented. Hyperscale AI data centers owned by big-tech companies are placing acute strain on energy infrastructure in the United States, the ...

A 137MW BESS connected to the California grid by RWE in 2023. Image: RWE. There will be "foundational" shifts in the US" two largest renewables and energy storage markets this year, California (CAISO) and ...

They installed 56%, 73%, and 100% more residential storage in quarter three than in quarter two respectively - despite residential battery supply shortages. These figures ...

Alaska residents spent three times more on energy than Florida residents in 2023 Data source: U.S. Energy Information Administration, State Energy Data System Data values: Primary energy, electricity, and total energy expenditure estimates

Data from market intelligence firm Rho Motion highlighted the US and Canada as the second largest regions, behind China, in globally installed battery energy capacity last ...

8 ???· The benefits come from capacity and energy supplied during the 35 highest-priced "energy events" on California's grid - hours that would otherwise be met by expensive, high ...

With RE+ bringing thousands of energy storage professionals to Las Vegas this week (8-11 September), here are some announcements that have hit the Energy-Storage.news desk. Fluence ships first US-made BESS Energy ...

5 ???· The proliferation of energy storage in everything from utility-scale batteries to electric vehicles is a driving force in the transition to a cleaner, more distributed power system.

Data from market intelligence firm Rho Motion highlighted the US and Canada as the second largest regions, behind China, in globally installed battery energy capacity last year. The US state of California alone installed half ...

The U.S. energy storage market is stronger than ever, and the cost of the most commonly used battery chemistry is trending downward each year. Can we keep going like this, or are we in a bubble bound to burst? ...
