

# Measures to support and encourage the development of new energy storage

What is the implementation plan for the development of new energy storage?

In January 2022, the National Development and Reform Commission and the National Energy Administration jointly issued the Implementation Plan for the Development of New Energy Storage during the 14th Five-Year Plan Period, emphasizing the fundamental role of new energy storage technologies in a new power system.

Why are energy storage technologies important?

They are also strategically important for international competition. KPMG China and the Electric Transportation & Energy Storage Association of the China Electricity Council ('CEC') released the New Energy Storage Technologies Empower Energy Transition report at the 2023 China International Energy Storage Conference.

Does the energy storage strategic plan address new policy actions?

This SRM does not address new policy actions, nor does it specify budgets and resources for future activities. This Energy Storage SRM responds to the Energy Storage Strategic Plan periodic update requirement of the Better Energy Storage Technology (BEST) section of the Energy Policy Act of 2020 (42 U.S.C. § 17232 (b) (5)).

Which energy storage projects have a low utilisation co-efficient?

According to a survey by the China Electricity Council, new energy distribution and storage projects have a low equivalent utilisation co-efficient of 6.1%, the lowest among the application scenarios, while the average for electrochemical energy storage projects is 12.2% (Figure 8).

What are the application scenarios for energy storage systems?

There is an extensive range of application scenarios for industrial and commercial energy storage systems, including industrial parks, data centers, communication base stations, government buildings, shopping malls and hospitals.

Why is investor participation important in the energy storage industry?

Investor participation is beneficial for the development of the energy storage industry. Facing trends, they should keep a cool head in assessing business models to identify high-quality segments and targets.

Its release followed an October 2024 announcement by the UK government of a new Long Duration Electricity Storage (LDES) investment support scheme that will help build energy ...

On February 28, the notice required the energy authorities of Guangdong, Guangxi, and Hainan provinces to speed up the issuance of development plans for new energy ...

## Measures to support and encourage the development of new energy storage

According to the document, China will launch initiatives to boost technology innovation in the new-type energy storage sector. These initiatives will include measures to ...

The State Council released a circular on the implementation plan to promote the high-quality development of new energy in the new era, drawn up by the National Development ...

Chinese authorities unveiled several measures on Monday to promote the new-type energy storage manufacturing sector, as part of efforts to accelerate the development of ...

The Greek measures Greece notified the Commission of its plans to provide support to two projects for the generation and storage of renewable energy for a total budget of EUR1 billion.

Electricity storage has an important role to play in this, both for energy storage as such and also for the stabilisation of the electricity system and the grids. Currently, a strong and market ...

China aims to further develop its new energy storage capacity, which is expected to advance from the initial stage of commercialization to large-scale development by 2025, with ...

Storage of energy will help in bringing down the variability of generation in RE sources, improving grid stability, enabling energy/ peak shifting, providing ancillary support services and enabling ...

Current regulations and policies in many jurisdictions pose significant risks that constrain development of battery energy storage which threaten the global goal of tripling of renewable ...

Driven by the national strategic goals of carbon peaking and carbon neutrality, energy storage, as an important technology and basic equipment supporting the new power ...

5 ???&#0183; China on Friday unveiled an action plan to promote the development of new forms of energy storage between 2025 and 2027, amid efforts to support green energy transition and ...

An action plan is issued, aiming to build a growth engine such as new generation information technology and new energy, and promote the high-quality development ...

The country will also promote coordinated industrial development. Greenpeace East Asia Beijing-based project lead Yao Yi said this move "signals a critical shift to boost the ...

On June 5, the Guangdong Provincial Development and Reform Commission and the Guangdong Provincial Energy Bureau issued Measures to Promote the Development of ...

In terms of energy storage policies, the United States has formulated long-term development goals and rolled

## **Measures to support and encourage the development of new energy storage**

out associated regulations and policies, encompassing ...
