

What is China's new energy storage plan?

The plan said that the new-energy storage industry is a key source of support for advancing the construction of a manufacturing powerhouse and promoting the efficient development and utilization of new-energy resources. By 2027, China aims to cultivate three to five leading enterprises in the ecosystem.

What is MIIT's new energy storage plan?

The plan, jointly issued by eight departments including the Ministry of Industry and Information Technology (MIIT) on Monday, seeks to foster high-quality development in the new-energy storage manufacturing.

What are the changes to planning legislation for energy storage projects?

The changes to planning legislation for larger energy storage projects were first announced back in October 2019 to allow planning applications to be determined without going through the Nationally Significant Infrastructure Project (NSIP) process.

How will China's new-energy storage industry grow by 2027?

Photo: VCG China has unveiled an action plan to boost full-chain development of the new-energy storage manufacturing industry, aiming to expand leading enterprises by 2027, enhance innovation and competitiveness, and achieve high-end, intelligent and green industry growth.

What is the 14th five-year plan for energy storage?

The "14th Five-Year Plan" has specified development goals for energy storage also on the provincial level. During the "14th FYP" period, 25 provinces and cities plan to complete 77.65 GW new type storage installation. That scale is more than twice the "14th FYP" target (30 GW) set by the NEA.

What will the new energy plan entail?

Renewables -- particularly solar -- are set to make up between 36% and 38% of overall generation in the revised energy plan to be drafted Wednesday, up 14 points from the current goal, with nuclear remaining flat at 20% to 22%. The share from fossil fuels will be cut to 41% from 56% now.

China's new renewable energy plan aims to significantly boost the country's renewable energy consumption, setting ambitious targets for 2025 and 2030. Unlike previous ...

ALBANY, N.Y. -- The New York State Public Service Commission recently approved the draft Bulk Energy Storage Program Implementation Plan, filed by the New York ...

On Feb. 10, 2025, China's Ministry of Industry and Information Technology and other seven central government departments jointly announced an action plan for sound development of ...

5 ???&#0183; China on Friday unveiled an action plan to promote the development of new forms of energy storage between 2025 and 2027, amid efforts to support green energy transition and ...

The Action Plan emphasizes addressing multi-dimensional safety technologies throughout the entire lifecycle and encourages new energy storage to participate in the ...

INTRODUCTION This Implementation Plan (hereafter the "2024-2030 Residential and Retail Storage Implementation Plan", or the "Plan") sets forth the program goals and implementation ...

OVERVIEW In October 2020, the State Council of the People's Republic of China released the New Energy Vehicle Industrial Development Plan for 2021 to 2035 (hereafter "Plan ...

Chinese authorities unveiled several measures on Monday to promote the new-type energy storage manufacturing sector, as part of efforts to accelerate the development of ...

The latest integrated resource plan (IRP) by NV Energy, recently previewed for stakeholders, calls for three new solar and battery storage projects - as well as new methane ...

5 ???&#0183; Announced by the National Development and Reform Commission (NDRC) and the National Energy Administration (NEA), the new plan is expected to drive CNY 250 billion ...

6 ???&#0183; The Plan positions solid-state batteries as a core driver for breakthroughs in new-type energy storage technology, promoting their transition from the laboratory to large-scale ...

Foreword Stepping up efforts to develop new energy storage technologies is critical in driving renewable energy adoption, achieving China's 30/60 carbon goals, and establishing a new ...

WASHINGTON, D.C. - The U.S. Department of Energy (DOE) today released its draft Energy Storage Strategy and Roadmap (SRM), a plan that provides strategic direction ...

2 ???&#0183; Shares of Chinese battery giants - including CATL, CALB, and REPT Battero - surged on Monday following the release of a new national energy storage plan.

5 ???&#0183; The plan encourages the development of energy storage facilities that can serve as alternatives to traditional grid infrastructure, as well as broader use of grid-based storage ...
