

Polish national development and reform commission energy storage policy

What are Poland's energy storage subsidy programs?

Poland's 2024-2025 energy storage subsidy programs are a key element in the country's energy transition. With the growing demand for stable energy sources and the integration of renewables into the grid, energy storage facilities take on special importance.

What is Poland's energy storage program?

The program, "Electricity storage facilities and infrastructure for improving the stability of the Polish power grid," is aimed at companies planning to invest in energy storage facilities with a capacity of at least 2 MW and a minimum capacity of 4 MWh.

Why should Poland invest in energy storage?

Development of energy production and consumption forecasting systems. Energy storage subsidy programs support the transformation of Poland's electricity grid into a more flexible and resilient system. Investments in storage facilities enable better integration of RES, improve grid stability and enhance the country's energy security.

How will Polish energy sector evolve in 2025?

Innovation in the wind power and energy storage sector is expected to increase in 2025. The "Moja Elektrownia Wiatrowa" program plays an important role in the modernization of the Polish energy sector. It supports the development of energy storage, improves energy efficiency and increases the share of RES in the country's energy mix.

Is Poland achieving its recovery and Resilience Plan?

reflects Poland's biannual reporting on the progress made in achieving its recovery and resilience plan. (11) The Commission published the 2023 country report for Poland on 24 May 2023. It assessed Poland's pro

What are the application deadlines for the energy storage program?

Application deadlines: Call for applications begins: September 2, 2024. End of call for proposals: December 20, 2024 or until funds are exhausted. The program introduces significant changes compared to previous editions. The installation of energy storage or heat storage is required for installations submitted from August 1, 2024.

The document presents a sectoral strategy aiming to address the key challenges that the Polish power industry must face until 2030, including growing demand for energy, inadequate fuel, ...

The Polish National Fund for Environmental Protection and Water Management (NFOSiGW) opened on April 4 a call for applications to co-finance energy storage facilities. ...
