

Regular energy storage power supply call for consultation

Does EirGrid need long duration energy storage?

EirGrid has today published A Call for Evidence on the Market Procurement Options for Long Duration Energy Storage (LDES). This Call for Evidence details the growing system need for Long Duration Energy Storage and potential procurement methods to provide a sufficient financial incentive for its connection.

How secure is our electricity supply?

The security of our electricity supply is key to successful delivery of the Clean Energy Superpower Mission and one of its key pillars - clean power by 2030. Achieving Clean Power by 2030 means we will rely even more on renewable power.

Why do we need a reliable energy supply?

Reliable energy supplies are fundamental for the economy, society and public services. Since its introduction in 2014, the CM has secured sufficient capacity to ensure consistent and reliable electricity generation. The CM has complemented the deployment of renewable and low-carbon energy by ensuring electricity security of supply in Great Britain.

Can a capacity provider be eligible for a managed exit?

To be eligible for a managed exit, we propose that a Capacity Provider must submit to the Delivery Body evidence of the Capacity Provider being party to a DPA, accompanied by a declaration signed by Directors. This evidence could include a summary of the DPA key terms being published in the public register by the Low Carbon Contracts Company.

Ministerial Foreword As the world swaps fossil fuel power for emissions-free electrification, batteries are becoming a vital storage tool to facilitate the energy transition. Global demand for ...

We will invest in clean generation technology and ensure the country has the energy storage it needs. Investing in clean energy at speed and scale can help tackle the climate crisis, create...

Declining costs of energy storage technologies, particularly lithium-ion battery storage, opens the potential for larger capacity and longer-duration energy storage projects to provide a broader ...

In response to the European Commission's Public Consultation on the EU's Energy Security architecture, EASE emphasizes the indispensable role of energy storage in achieving a secure, ...

The Electricity Storage Network has been engaging extensively on Long Duration Energy Storage and hosted a specific members workshop, one-to-one meetings, and our Innovation and ...

Regular energy storage power supply call for consultation

This call for evidence paper seeks to explore if there is a needs case for Long Duration Energy Storage (LDES), examining the potential barriers to investment, the services provided by ...

The LDES Council conducted research showing least cost solutions to decarbonize energy grids require long duration energy storage.³ Further, this research indicates global spending on long ...

Hydrogen to power (H2P) is one low carbon technology capable of providing low carbon inter-seasonal storage, whilst providing a decarbonisation pathway for unabated gas.

Australian energy minister Chris Bowen (left) visiting battery storage manufacturer Gelion's premises. Image: Gelion. The government of Australia has opened a public ...

Energy storage and security of supply Energy storage is indispensable to ensure the security of the clean energy transition, as it can play a crucial role in providing flexibility, stability and ...

This Call for Evidence details the growing system need for Long Duration Energy Storage and potential procurement methods to provide a sufficient financial incentive ...

This consultation is seeking views on the government's minded-to position for a business model to incentivise deployment of power bioenergy and carbon capture (BECCS) ...

22. Figure 1 below provides an overview of the steps and timelines for the CSRB buffer discretion process for Winter 2025. Box 2 explains the steps in more detail. This is the process we will ...

An energy storage system also allows for the storage of additional energy from renewable energy sources, which can potentially reduce the curtailment of renewable energy ...

By enabling the storage of electricity when supply is high or prices are low, and releasing it during periods of high demand or cost, LDES can help reduce waste, lower prices, ...

On May 6th, the UK Government published the final results of the recent Capacity Market consultation. This plan ensures that the country maintains a constant supply ...
