

Residential solar battery project financing options in Guernsey 2026

How many solar panels are there in Guernsey?

A solar panel project at a Guernsey charity is now complete and will power about 40 homes, Guernsey Electricity said. There are 310 photovoltaic panels on the roof of the newly reopened Guernsey Rural Occupational Workshop (Grow) site. The charity worked with Guernsey Electricity and The Little Green Energy Company on the scheme.

What is the energy strategy for Guernsey?

The Electricity Strategy for Guernsey covers the period up to 2050. The Committee for the Environment & Infrastructure considered several different ways in which Guernsey could meet its future demand including solar, wind, tidal, additional interconnectors, energy storage and alternative fuels.

How does wind energy work in Guernsey?

Wind energy provides mechanical power using wind turbines that turn electric generators for electrical power. Solar energy is radiant light and heat from the sun harnessed using a range of technologies such as photovoltaics. Air source heat pumps are the cheapest and cleanest way to heat a home in Guernsey.

Does Guernsey have on-island solar energy?

Alan Bates, CEO of Guernsey Electricity Guernsey has already started on-island renewable generation with community-scale solar arrays feeding over 350kW of renewable solar power into the grid. This means that no matter your property size, a portion of your electricity will always come from on-island solar energy. And more will come in future.

Does Guernsey need a green economy?

It is essential that Guernsey can manage its own transition to a green economy effectively and so a strategic direction must be set, along with a market structure that supports this, and provide certainty to the energy industry. The Electricity Strategy was approved by the States of Deliberation in September 2023. What was proposed?

Where should an offshore wind array be located in Guernsey?

Feasibility studies to date have shown that the most optimal location for an offshore wind array in Guernsey's territorial waters is the west coast. The offshore wind feasibility report completed in 2016 is available in the downloads section of this page, along with a summary document.

Residential solar and battery systems will need to be installed by December 31, 2025 to qualify for a 30% federal tax credit. In 2026 and beyond, there will be no credit for homeowners to claim.
