

# Residential solar battery tender price in New Zealand 2025

How much does a solar battery cost in New Zealand?

The lowest price paid was \$8,000 for a 6 kWh battery, which implies that smaller systems can be more accessible for those on a budget. The best value was \$9,000 for a 9.6 kWh battery, equating to \$937.50 per kWh. Indicating the batteries below \$1000/kWh can be hunted down in the NZ market. What's Next for Solar Prices in 2025?

Are solar panels on the rise in NZ in 2025?

Solar panel costs in NZ in 2025 are on the rise, and this trend is expected to continue. If you've been considering solar energy for your home or business, now is the time to take action and install solar panels in your home. Recent industry analyses indicate that solar module prices have begun to rise for the first time in over two years.

How much does a solar power system cost?

**Average Price For A Solar Power System:** The typical solar power system size from our dataset was a 7kW, the average cost for this system size was \$16,492. **Battery Systems Prices:** The average battery cost is \$1,249.79 per kWh, with smaller systems offering affordability and larger systems offering better value per kWh.

Are batteries worth it in New Zealand?

Batteries can increase the financial benefits from solar PV but remain too expensive for many households in New Zealand. Instead of batteries, hot water diverters and timers can improve returns with lower upfront costs by making use of existing hot water cylinders to store solar energy.

Why are solar systems so expensive in New Zealand?

All you need to do is reach out to us. Since the end of 2020, the pricing of solar systems in New Zealand for grid-tied, commercial and off-grid solar, has increased by about 25%. This is the result of supply chain constraints and price increases, inflation and the volatility of the US dollar.

How will new government regulations affect solar installation in NZ?

Beyond pricing and buy-back rates, new government regulations also make solar installation NZ-wide easier and more attractive: Rooftop solar panels on existing residential buildings no longer require building consent. New homes with solar panels must receive consent within 10 working days--half the previous waiting time.

Additionally, these batteries, alongside more renewable generation, will help off-set the retirement of thermal generation and support New Zealand's transition to a low-emissions economy. New Zealand's first grid ...
