

Successful bid price of wind solar storage project in Poland 2026

How many solar projects were approved in Poland in December?

Poland's URE has shared the results of seven renewables auctions that took place in December. An auction for solar and wind installations greater than 1 MW received 172 solar bids and two onshore wind bids. It approved 126 solar projects totaling around 1,481 MW and the two wind projects totaling 90.8 MW.

How many solar projects were approved?

In the auction for projects greater than 1 MW, 172 bids were submitted for solar, while only two bids were made for onshore wind. A total of 126 solar projects, amounting to approximately 1,481 MW, were approved, alongside two wind projects totaling 90.8 MW.

Is energy storage a good investment in Poland?

In Poland, interest in energy storage investment has been evident for some time. Last year's main auction of the power market, with capacity delivery for 2029, further bumped up the capacity of storage projects.

How much storage capacity does Poland have in 2024?

The Polish Economic Institute reported that in the power market's main auction, which was held in December 2024, storage capacity of around 2.5 GW was contracted, indicating that this was a 44 percent increase over 2023, in which the total contracted for batteries was 1.7 GW.

What is the minimum price for solar & wind?

The minimum price for solar agreed under the auction was PLN 244.80 (\$59.67)/MWh compared to a maximum price of PLN 334.77/MWh, against a reference price of PLN 389/MWh. The minimum price for wind agreed was PLN 149/MWh compared to a maximum price of PLN 175/MWh, against a reference price of PLN 324/MWh.

How much solar power does Poland have?

Figures from URE show that since Poland's renewables auctions began in 2016, more than 274 TWh of electricity worth almost PLN 67 billion has been contracted, with the vast majority covering newly designed installations. Poland added around 4.6 GW of solar in 2023, taking its cumulative installed capacity beyond 17 GW.

Figures from Poland's Energy Regulatory Authority (URE) show that solar accounted for 198 of the 200 successful bids awarded under the country's latest renewables auctions. Auctions covering hydroelectric power plants, agricultural ...

The contracts provide an additional premium in EUR/kWh to winning projects for energy discharged to the market. Prices for the successful bids range from EUR 0.0776/kWh to ...

Successful bid price of wind solar storage project in Poland 2026

The competitive round will offer 9,378 MW of capacity from ground-mounted and rooftop solar and floating photovoltaic (PV) projects, as well as onshore wind schemes, to be installed between 2026 and 2029. The tender ...

Poland's energy regulator URE has scheduled the 2025 renewable energy auctions for the period July 1-9, planning to allocate a total 75.9 TWh of energy in contracts worth PLN 31 billion (USD 9bn/EUR 7.2bn).

The successful projects will provide power from 2026 onwards and will bolster the UK's energy independence, helping to protect families and businesses from global gas price shocks.

In the second quarter of 2025, Statkraft Poland achieved a major milestone in the development of battery energy storage systems. The Norwegian renewable energy leader now has projects with confirmed grid ...

Some 618 MW of projects were awarded in this year's auctions for the sale of electricity from renewable sources in Poland, which were conducted in November, the country's Energy Regulatory Office (URE) said on ...

Greenvolt Group has a longstanding presence in Poland, with nearly 18 years in the Utility-Scale sector through what is now Greenvolt Power, overseeing the development of Wind, Solar, and Energy Storage projects.

A year earlier, EDF Renewables bought its first battery energy storage project, of 50 MW, in Poland which is to be commissioned in early 2026. In mid-December last year, the ...

A total of 126 solar projects, amounting to approximately 1,481 MW, were approved, alongside two wind projects totaling 90.8 MW. In a separate auction for solar and wind projects under 1 MW, 96 solar bids were received, ...

Deep Dive: Poland's Path Toward a Hydrogen and P2X Future Moldova aims to achieve energy independence by 2030. The government's action plan outlines 22 actions related to major ...

Solar PV dominated Poland's 2025 renewable energy auctions, winning 126 out of 129 bids, securing 1.67 GW capacity Large-scale solar won the majority of funding, with 95 ...

Nineteen projects were announced as winners in the government's CIS announcement yesterday - including seven standalone solar farms and six standalone wind ...

According to the regulator, the average price offered by the winners in this tender was 7.5% higher than that registered last year, when the range was PLN 162.83/MWh to PLN 233.29/MWh. The latest auction took

Successful bid price of wind solar storage project in Poland 2026

place on November ...

Successful bids ranged between EUR 0.0469/kWh and EUR 0.0518/kWh, while the volume-weighted average was EUR 0.0503/kWh. The innovation tender allowed hybrid ...

The Polish Energy Regulatory Office (ERO) has announced the final results of its solar and wind auction for projects above 1 MW and another procurement exercise for ...
