

# The latest japanese energy storage layout plan

What is Japan's energy storage policy?

As policy, technology, and decarbonization goals converge, Japan is positioning energy storage as a critical link between its climate targets and energy reliability. Japan's energy storage policy is anchored by the Ministry of Economy, Trade and Industry (METI), which outlined its ambitions in the 6th Strategic Energy Plan, adopted in 2021.

What is Japan's Strategic Energy Plan?

The Government of Japan formulates the Strategic Energy Plan under the Basic Act on Energy Policy to show the basic directions for Japan's energy policies. The Advisory Committee for Natural Resources and Energy started discussions on the Seventh Strategic Energy Plan in May 2024 and presented the draft version of the plan on December 17, 2024.

How is Japan's energy storage landscape changing?

Japan's energy storage landscape is shifting, pushed by household demand, corporate ESG mandates, and domestic battery manufacturing. The residential lithium-ion market, projected to grow at a CAGR of 33.9% through 2030, remains one of the fastest-expanding segments.

What is the target range for Japan's Strategic Energy Plan?

This context likely influenced the broad target range of 40-50% set in the plan. In the previous Strategic Energy Plan, the target for 2030 was 36-38%. A 40% target allows for achieving the goal with only minimal progress. Notably, the Japanese government frequently changes rules after projects are awarded, essentially "moving the goalposts."

Does Japan's energy storage rollout face structural headwinds?

Despite strong policy signals, Japan's energy storage rollout faces deep structural headwinds. The nation's split-grid architecture--50 Hz in the east and 60 Hz in the west--limits electricity transfer and complicates nationwide deployment.

How big is Japan's battery storage capacity?

Rystad forecasts Japan's battery storage capacity could reach about 4 GW based on projects under construction, planned and awarded, which would require \$6 billion in investment.

The Department of Energy Office of Electricity Delivery and Energy Reliability Energy Storage Program would like to acknowledge the external advisory board that contributed to the topic ...

A render of the BESS project. Image: ORIX Corporation / PR Times. Tesla and Sumitomo Electric have both been selected to supply energy storage projects in Japan. Tesla ...

# The latest japanese energy storage layout plan

The government is also reforming its battery energy storage system (BESS) regulations, with batteries set to play an important role in maximizing renewable energy supply and avoiding grid constraints. We look at ...

Japan's energy policy, outlined in the 6th Strategic Energy Plan, remains fossil-fuel heavy and focuses on unproven technologies. The country's electricity prices are dictated ...

Only three years have passed since Japan wrote its Sixth Basic Energy Plan, but that short period has proven to be highly eventful and decisive for Japan's plans to transition to ...

A total of 27 projects was awarded 34.6 billion yen in subsidies through METI's FY2024 program for supporting the expansion of renewable energy through introduction of ...

The Government of Japan formulates the "Strategic Energy Plan" to show the direction of Japan's energy policy. It is reviewed at least every 3 years in view of the latest energy situations at ...

Given the fundamental direction of Japan's energy landscape, energy storage technology is set to play an integral part in Japan's energy future due to energy storage technology's role in both ...

During policy discussions to shape the next Strategic Energy Plan by the end of fiscal year 2024-2025, METI Minister Saito Ken remarked, "I have a strong sense of crisis that Japan is in the ...

5 ???&#0183; Kansai Electric Power plans to build an approximately 400MWh battery storage facility at the former Tanagawa Power Station site in Misaki Town, Osaka Prefecture, The Nikkei reported on May 6, 2025.

Foreword Stepping up efforts to develop new energy storage technologies is critical in driving renewable energy adoption, achieving China's 30/60 carbon goals, and establishing a new ...

The Government of Japan formulates the "Strategic Energy Plan" to show the direction of Japan's energy policy. It is reviewed at least every 3 years in view of the latest energy situations at home and abroad, and revised if ...

Japan's energy storage market is experiencing a wave of significant growth, as ESN Premium hears from Eku Energy and BloombergNEF. In the past few months, Energy ...

Japan's government has just approved the nation's 7th Strategic Energy Plan (SEP), setting the course for medium to long-term energy policy. The SEP, which is produced by the Ministry of ...

Tesla's Megapack grid-scale batteries have been selected to back an energy storage project in Japan, coming as the latest of the company's continued deployment of the ...

# The latest japanese energy storage layout plan

5 ???&#0183; A total of 12 projects totaling 180MW/595.3MWh was awarded 13 billion yen through Tokyo's FY2024 subsidy for promoting grid-scale battery storage, the metropolitan government's document released in February 2025 ...
