

Wartsila 46TS engine provides improved output and efficiency to save fuel and costs, with future proof technology that can run on sustainable fuels Technology group Wartsila launches today its next generation 46TS engine, ...

Wartsila also offers Quantum, a fully integrated and modular energy storage system that offers the fastest deployment times, highest quality control and maximum flexibility.

Inside information: Wartsila separates its Energy segment into two reporting segments: Energy and Energy Storage, and introduces new financial targets Wartsila; ...

Wartsila ES& O claims Quantum 2 (pictured) enables much faster installation while not compromising on safety or performance. Image: Wartsila ES& O Wartsila's new Quantum 2 containerised battery energy ...

Wartsila is a global technology company specializing in innovative energy solutions. Their focus is on integrating renewable energy systems for a sustainable, low-emission future. Committed to decarbonization, ...

Technology group Wartsila has been selected to deliver its second major energy storage project in South Australia. Located in Bungama, stage 1 of this multi-stage project will be supplied to Amp Energy, a global ...

If you look at what is the fastest type of new energy supply you can get, it's either through energy storage that's pulling off the grid at other hours of the day, or a hybrid project with solar. It's the fastest, and in many places, ...

Wartsila has a leading position in power system optimisation, where both energy storage and flexible grid-balancing engine power plants play a key role. In marine, Wartsila is a market ...

Safe, efficient, and scalable solutions that maximise returns and safe-guard long-term investments By integrating renewables, energy management technology, and storage with traditional energy resources, we deliver reliable, optimised, ...

The Shetland Standby Project will use Wartsila's Quantum energy storage technology and will be supported by a 15-year long-term service agreement (LTSA) to ensure ...

Technology group Wartsila has expanded its long-term partnership with EDF Renewables UK

and Ireland (hereafter EDF Renewables) to accelerate the United Kingdom's ...

The demand for balancing technologies is closely linked to the increasing share of intermittent renewables in the energy system. Renewable-led power systems require ...

W&#228;rtil&#228; also offers Quantum, a fully integrated and modular energy storage system that offers the fastest deployment times, highest quality control and maximum flexibility. W&#228;rtil&#228; has an unparalleled safety record in ...

Technology group W&#228;rtil&#228; has passed a significant milestone in ensuring the safety of its energy storage system (ESS), GridSolv Quantum, by successfully completing UL 9540A unit-level testing. Fire safety is a major ...

The technology group W&#228;rtil&#228; is finalising a 70MW energy storage and energy management system project in the California Independent System Operator (CAISO) energy ...

With GEMS's machine learning and optimisation power, Quantum3 can intelligently leverage energy supply during times of high energy cost to significantly reduce ...
