

What is a battery energy storage system?

A battery energy storage system (BESS), battery storage power station, battery energy grid storage (BEGS) or battery grid storage is a type of energy storage technology that uses a group of batteries in the grid to store electrical energy.

What does WH mean in a battery?

It indicates how much current a battery can deliver over a specific period. o Wh (Watt-Hour): Measures energy capacity. It represents the total energy a battery can supply. o Relationship: $Wh = Ah \times Voltage (V)$. This formula connects the charge capacity to the energy capacity, factoring in the voltage.
