

"Water-in-salt" (WIS) electrolytes exhibit enlarged electrochemical stability windows compared to conventional dilute aqueous electrolytes, which helps to achieve high-voltage aqueous ...

A fast self-charging and temperature adaptive electrochromic energy storage device Self-charging electrochromic energy storage devices have the characteristics of energy ...

A novel lead-free $(1 - x)\text{CaTiO}_3\text{-}x\text{BiScO}_3$ linear dielectric ceramic with enhanced energy-storage density was fabricated. With the composition of BiScO_3 increasing, the dielectric constant of $(1 - x)\text{CaTiO}_3$...

The Roadmap proposed a comprehensive set of recommendations to expand New York's energy storage programs to cost-effectively unlock the rapid growth of renewable energy across the State and bolster grid reliability and customer ...
